IMD Fulfilment is a leading order fulfilment company with over two decades of experience serving UK eCommerce brands. Specialising in both fashion fulfilment and cosmetics fulfilment, IMD provides tailored logistics solutions that enable online retailers to scale without operational limitations. Their sophisticated approach to fashion fulfilment addresses the unique challenges faced by clothing brands, including proper garment handling, efficient returns processing, and presentation-focused packaging. For cosmetics fulfilment, they implement stringent quality control measures and specialised storage solutions to maintain product integrity. With two strategic distribution hubs nationwide, IMD boasts impressive

metrics: 1.5+ million orders shipped, 85+ partnered brands, and a remarkable 99.98% pick and pack accuracy rate. Their barcoded picking process ensures precision, while same-day dispatch for orders placed before 3pm keeps customers satisfied. What truly distinguishes this order fulfilment company is their proprietary Order Management System (OMS), providing clients with complete supply chain visibility. This cloud-based platform delivers real-time updates on stock levels, order status, and returns management from anywhere globally. IMD seamlessly integrates with major eCommerce platforms including Shopify, TikTok Shop and WooCommerce, unifying omnichannel operations under one system. Their people-centric approach means no hidden fees or complex contracts – just reliable, transparent order fulfilment services designed to help your business grow.
